

## CARPET, VINYL, AND PLASTIC DYES

### DESCRIPTION AND PRODUCT BENEFITS:

Carpet, Vinyl, and Plastic Dyes are available in various colours, matched to O.E.M. colouring standards. Use to restore automotive carpet, vinyl and plastic. Specially formulated to leave the carpet and vinyl soft and flexible, with a permanent coating that will not crack, split, peel, or rub off.

### DIRECTIONS OF USE AND APPLICATION:

1. Prepare the surface of the application. Remove dirt, silicone, grease, and grime. Rinse the area with clean water and dry thoroughly with a clean cloth before refinishing. Protect adjacent surfaces from overspray. 2. Shake well before and during use; shake for 2 minutes after the ball within the aerosol begins to rattle. Repeat this step for 10 seconds after each minute of use. 3. For a professional finish, spray 10 to 25 cm from the area of application, in a sweeping motion. Avoid runs and drips by applying several light coats. Allow at least 5 minutes between coats, if required. 4. Clean spray valve immediately after use; to clean turn aerosol upside-down and spray until clear. *Tips: if the spray button becomes clogged, pull off and clean - do not stick pins or wire into the can opening. Replace the spray button with the valve opening pointing away from you.*

### PRECAUTIONS:

Test spray in an inconspicuous area or on a scrap piece of material to verify compatibility. Use at room temperature (20°C) for best results. Extremely flammable, keep away from open flames or sources of ignition; do not burn, incinerate or puncture container. Keep away from temperatures above 50°C. Do not mix with other chemicals. Keep from freezing.

### HEALTH & SAFETY INFORMATION:

For further information on the safe handling, storage and precautions for use of this product, consult the Safety Data Sheet. Keep out of reach of children.

### DISCLAIMER:

As the actual conditions of use are out of our control no liability is accepted for any loss or damage caused directly or indirectly through the use of our products. Intending users should satisfy themselves, by carrying out appropriate tests, as to the suitability of this product for any particular purpose.

### TYPICAL DATA:

#### APPEARANCE:

Aerosols of varying colour.

#### SPECIFIC GRAVITY:

~0.83 g/ml

#### ODOUR:

Solvent.

#### SOLUBILITY:

Insoluble in water.

#### % NON-VOLATILE:

~ 47%

#### FLASH POINT:

-97°C
